

Orientation

WELCOME TO THE NIGHT SCHOOL, FIREFLY.

As you embark on your studies, learn The Night School mantra (see page 6). If you encounter any roadblocks during your studies, use the mantra to bring you back to the mystic.

GATHER YOUR SUPPLIES FOR ALL NIGHT SCHOOL STUDIES:

A journal, candles, a window, a deck, front stoop, sit spot or meadow, and a pocket compass. Don't forget your additional supplies for Semester 1 - a pinch of gumption and a cup or two of salt!

Semester 1

MIDNIGHT FOUNDATIONS (PHILOSOPHY 101):

This course is required for all Night School students. The concepts you will learn - from finding the spark of energy in your daily life, to examining the connection between science and magic to realizing the quiet magic in the balance of opposites - provide the structure that elevates all the courses to follow.

THE MYSTERIES OF BEING HUMAN (PSYCHOLOGY 101):

This class is the key to understanding the central figure in your Night-life: you. Enter your own darkness and turn your gaze inward, to examine the mystery of how you behave, think, and feel. You'll illuminate areas of yourself that have been hanging out on the dark side of the moon, out of sight and, often, out of mind.

DIVINING THE NIGHT (DIVINATION 101):

In this theory class, you'll encounter the multistep process of Night Knowing, which starts with recognizing the patterns in your surroundings, getting clear on your question, and interpreting the answer you receive. Study hard and save the practical experience for Divination Lab next semester!

Semester 2

GATHER YOUR ADDITIONAL SUPPLIES FOR SEMESTER 2:

A rattle, a pendulum, an herb bundle, a tarot or oracle deck, a scrying mirror, ingredients for Bananas Foster, an ephemeris, and a star map.

TOOLS OF THE MYSTIC (DIVINATION LAB):

In this hands-on course, experiment with the different forms of divining, using tools such as a pendulum, smoke, your dreams, and imagination.

ELEMENTAL ALCHEMIZATION (ALCHEMY 101):

With your kitchen as your workshop and history as your guide, explore the four elements - Earth, Air, Fire, and Water. As you ponder your lessons, be sure to complete your homework, and treat yourself to Bananas Foster!

HARNESSING THE CELESTIAL TIDES (ENERGETIC ENGINEERING 101):

In your final course, trace the history of stargazing and systems of astrology across a myriad of cultures. Then, follow the cycles of the moon and explore the outer reaches of the solar system as you deepen your knowledge of the planets and stars of the Night sky.

LET'S STEP INTO THE NIGHT!
